## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 3 and 7 are objected to because of the following informalities: In claims 3 and 7, the words "singing" (recited twice in each claim) should be changed to --swinging--. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The exact meaning of the phrase "rotatably back and forth", as recited in claims 1, 2, and 6 is not clearly understood.

There is no clear antecedent basis for "the end portion of the shaft" as recited in line 5 of claims 2 and 6.

The repeated use of the term "fallen" in claims 2, 3, 5, 6, and 7 is not clearly understood.

***Allowable Subject Matter***

4. Claims 1, 2, and 6 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
5. Claims 3-5 and 7-17 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Specification***

6. The abstract of the disclosure is objected to because it contains legal phraseology such as "means" in lines 10 and 12 which should be avoided. Correction is required. See MPEP § 608.01(b).
7. 35 U.S.C. 112, first paragraph, requires the specification to be written in "full, clear, concise, and exact terms." The specification is replete with terms which are not clear, concise and exact. The specification should be revised carefully in order to comply with 35 U.S.C. 112, first paragraph. Examples of some unclear, inexact or verbose terms used in the specification are: "may be sideways inclined", "in structure and using", "so as to be driven away", and "not giving repulsed feeling". These are just four examples (all recited on page 2 of the specification), but the entire specification should be carefully revised to correct similar errors.

***Information Disclosure Statement***

8. The references listed on the IDS submitted 1/3/07 have been lined through because applicant lists these two references as priority documents, but they cannot be considered as prior art.

***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each of the remaining cited patents shows a tool for picking up and carrying dog waste comprising a receiver and a movable closure.
